CONSTRUCTION ADVISORY

THOBURN GARAGE CONCRETE POURS START AUGUST 7

Concrete pours for the Thoburn Garage, an underground parking structure, **will commence on August 7 and will continue weekly through April 2019**. Most impacts are expected to be limited to the Serra Street side of the project, as concrete pours will take place below grade.

**Efforts will be made to complete pours by 7:00pm.** However, due to the nature of parking structure concrete placement, certain pours will be subject to delays and risks beyond the project team’s control, such as:

- Weather (air temperature, precipitation, and humidity)
- Bay Area traffic congestion
- Concrete demand in the Bay Area and the ability of batch plants to produce concrete

If it becomes apparent that a pour will extend beyond 7:00pm, a notice will be shared with the appropriate housing front desks and a text message alert will be issued by 6:00pm of that day. For those interested in receiving such alerts via mobile text messaging, please sign up on the project website or by texting EVGR to 662-200-4303.

Thank you for your patience while we work to improve Escondido Village.
